

Mykolas Stramkauskas

Junior Front-End Developer

msmykolas@gmail.com
+37062444773

Vilnius

Profile

I am a passionate and quickly learning starter in React.js and TypeScript with a certificate from a JavaScript (Front-End) course. Before I decided to become a Front-End Developer I worked as QA Specialist. I decided to change my position because I was always interested in coding, knew some of it from self-learning. Finally, I decided to fully commit to it by completing JavaScript course.

Education

JavaScript (Front-End), Vilnius Coding School, Vilnius

02/2023–03/2023

In this course, I have developed skills for theoretical knowledge and practical skills in JavaScript including React.js and TypeScript. I know how to work with Figma design using HTML, CSS and Bootstrap and create functionality with JavaScript, React and TypeScript.
